HYDE TOOLS INTRODUCES 5 NEW VALUE SERIES ADHESIVE SPREADERS

SOUTHBRIDGE, MA – Hyde Tools has rolled out a new line of economical adhesive spreaders, each designed with two notched sides. From small mosaic tile to large ceramic floor pavers, there is a new spreader to get every tile job done right.

Each 9" x 4" spreader is comprised of carbon steel and has a rolled steel handle for easy gripping. All have notches on two sides – a 9" side for general spreading and a 4" side for reaching into corners or tight areas.

Cleanup is easy when the project is complete. Since the handle and spreader are one carbon steel piece, they rinse clean, hold up well for multiple jobs and outlast other economical spreaders.

The five new Value Series Adhesive Spreaders include:

- **Item #19080:** Carbon Steel Adhesive Spreader with 1/4" x 1/4" x 1/4" square notches on 2 sides
- **Item #19081:** 9" x 4" Carbon Steel Adhesive Spreader with 1/4" x 3/8" x 1/4" square notches on 2 sides
- **Item #19082:** 9" x 4" Carbon Steel Adhesive Spreader with 1/2" x 1/2" x 1/2" square notches on 2 sides
- **Item #19083:** 9" x 4" Carbon Steel Adhesive Spreader with 1/4" x 3/16" V-notches on 2 sides
- **Item #19084:** 9" x 4" Carbon Steel Adhesive Spreader with 3/16" x 5/32" V-notches on 2 sides

These products are available now for purchase and shipment from Hyde's Southbridge warehouse. For more information, contact your Hyde Tools sales representative, email custrelations@hydertools.com or call (800) 872-4933.
