FOR IMMEDIATE RELEASE

May 6, 2014

**THE HYDE® DUST-FREE SPONGE SANDER™
For sanding wood, metal or drywall**

SOUTHBRIDGE, MA – If you have ever tackled a sanding project, you know first hand that even the smallest sanding jobs can create a big mess. Keep your floor, household items and lungs free of dust with the help of the new HYDE® Dust-Free Sponge Sander™.

The Dust-Free Sponge Sander™ provides a simple solution to the mess that indoor sanding projects cause. This innovative tool significantly cuts down on cleanup time by eliminating up to 95% of dust caused by sanding, making it ideal for projects such as cabinet and molding refinishing, furniture and stairway restoration and drywall patching.

The sander has a small profile, easy-to-grip sanding head for use on flat surfaces, edges, and corners. It can be used to sand any wood, drywall or metal surface. In place of sandpaper, the Dust-Free Sponge Sander™ uses sanding sponges, which are both washable and replaceable.

The Dust-Free Sponge Sander™ kit includes a lightweight hand sander with two medium-grit sanding sponges and a vacuum hose that will fit any standard shop-type or industrial vacuum.

Applications Include:

- Cabinet and molding refinishing
- Furniture restoration
- Stairway restoration
- Drywall patching and sanding
