HYDE® PIVOTPRO™ WATER WANDS READY FOR RETAIL **Hyde Rolls Out the Next Generation of Water Tools**

SOUTHBRIDGE, MA – Hyde Tools announces the roll-out of the **HYDE® PivotPro™ Water Wands**, a new line of water tools that make cleaning faster, easier and more effective for a wide range of **Boat & Auto** and **Outdoor Cleaning** jobs. First unveiled at the 2014 National Hardware Show in Las Vegas, the PivotPro™ wands are now available for distribution and retail, and will be showcased at the 2015 National Hardware Show at booth #37121 in the lawn and garden section.

This new generation of outdoor water tools is designed to include everything a consumer needs to accomplish specific jobs effectively. In addition to adding 46 inches of extra reach, the PivotPro™ comes equipped with a 16-ounce dispenser for soap and other additives, and has built-in brush attachments. The Boat & Auto model, for example comes with a soft-bristle brush for scrubbing cars, trucks and boats without damaging the surface. A kit version of the same tool offers more accessories, including an abrasive spindle brush for cleaning wheel wells and a microfiber shammy. All of the accessories can be attached to the business end of the tool, near the nozzle.

Similarly, the PivotPro™ Outdoor Cleaning Water Wand comes with a hard-bristle brush for cleaning tough grime and mildew, while the kit version also contains a spindle brush attachment for cleaning decks, railings and fences.

“Throughout the design of each PivotPro™ model, we anticipated what the user would need to see a job all the way to completion with just one tool,” said Corey Talbot, Hyde’s Vice President for Marketing and Product Development. “For example, with the

PivotPro™ for Boat & Auto, you can soap up your car using the dispenser, scrub with the soft-bristle attachment, clean the rims with the spindle brush and get a great finish with the microfiber pad. That entirely eliminates the need for sponges, buckets and soapy water.”

Talbot also noted that with the pivoting nozzle and long reach, the PivotPro™ allows a far more thorough treatment of hard-to-reach jobs without having to bend, kneel or stoop. In addition to putting more power in the hands of the user, the PivotPro™ soap/mix dispenser has a soap-to-water ratio control that makes getting the right mix as easy as turning a dial. And switching from mixture to clear water to off is literally as easy as flipping a switch.

The Boat & Auto tool is available in two models:

- HYDE® PivotPro™ Boat & Auto – Item #28480

Includes: soft-bristle adjustable brush with rubber bumper

- HYDE® PivotPro™ Boat & Auto Kit with three attachments – Item #28485
