FOR IMMEDIATE RELEASE

HYDE INTRODUCES THE DIG-IT™, A NEW DEMOLITION TOOL FOR PROS

SOUTHBRIDGE, MA – Hyde Group has introduced a sturdy new multipurpose removal tool designed specifically for demolition.

The new **HYDE® DIG-IT™** (item #43670) is a heavy duty removal and scraping tool with features for digging out caulk, grout, mortar, and other difficult-to-remove materials.

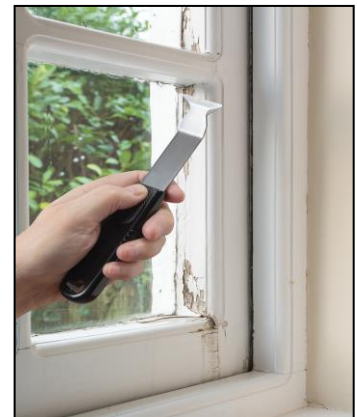

This tool has a scraping edge to remove paint, mastic, and other matter and two sharp points for removing more challenging materials.

The DIG-IT™ features a heavy duty carbon steel blade with a chemical resistant nylon handle. The blade is angled to allow for vigorous scraping while protecting knuckles.

“This tool cuts across many professions and is a good tool box addition for painters, remodelers, masons, and many other pros,” noted Corey Talbot, Vice President of Marketing and Product Development for Hyde Group. “It’s designed to handle the removal of virtually any material.”

Important features include:

- Heavy duty high carbon steel blade
- Beveled scraping edge for push or pull scraping
- Sharp points on both sides for removing mortar, caulk, or grout
- Bent blade with thumb notch protects knuckles and allows for safe scraping

For more information on the HYDE® DIG-IT™, contact your Hyde sales representative, or contact Hyde Tools customer relations at 1-800-872-4933.
