FOR IMMEDIATE RELEASE

HYDE GROUP FEATURES THREE SPECIALTY SNAP-OFF KNIVES AT THE 2017 NATIONAL HARDWARE SHOW

SOUTHBRIDGE, MA – Hyde Group has added three new items to its full line of utility knives, including two heavy-duty snap-blade knives for rugged jobs and a fine-blade, angled knife for more detailed work. The new knives include:

A rugged 25mm utility knife (HYDE® item #42051). This professional-quality retractable utility knife handles well and cuts easily through carpets, linoleum, drywall, and much more. The knife uses 25mm snap-off blades (seven points per blade), and has a powerful screw lock that withstands up to 110 pounds of holding force. The sturdy rubber grip and reliable locking system make this a safe and powerful choice for even the toughest jobs. This utility knife also features a heavy-gauge, anodized steel blade holder for durability, a strap hole for easy carrying or storing, and a spare blade holder within the handle.

A heavy-duty, 18mm knife (HYDE® item #42050). Many of these same features apply to Hyde's new 18mm snap-off knife, whose heavy-duty screw lock withstands 44 pounds of force — sufficient for a wide range of demanding cutting jobs. The 18mm snap-off blades have eight points per blade for a lengthy duration of continuous cutting from a single blade.

A 9mm detail knife (HYDE® item #42046). This slim 9mm utility knife is specifically designed for detail work. It has a 30-degree cutting angle, a thin sharp 9mm blade for precision cutting, and a blade breaker for safely refreshing the blade. The autolock system withstands up to 17 pounds of force, and each blade has eight sharp points.

As with all HYDE® utility knives, Hyde also offers replacement blades for each model. For more information visit hydetools.com or contact Hyde Group customer relations at 1-800-872-4933.
