**The Hyde[®] MAXXGRIP PRO[®] Wire Brushes
A Great Multi-Trade Tool**

The MAXXGRIP PRO[®] line of carbon and stainless steel wire brushes are professional grade prep tools that will benefit painters, plumbers, machinists and masons. These industrial grade brushes are ideal for scraping paint, removing rust, dirt, oxidation and corrosion, cleaning cement, deburring small engine parts, or cleaning copper and aluminum tubing.

The ergonomic soft-grip handle maximizes gripping effort, eliminates pressure points, and the built-in guard protects fingers. The brushes are solvent resistant, easy to clean, with a tapered nose for corners and tight access applications.

With 7 different styles, available in carbon or stainless steel, there is a MAXXGRIP PRO[®] brush for every job, from detail work to large surface prep.

Look for these versatile brushes wherever you buy hand tools.

Hyde Tools, based in Southbridge, Massachusetts, is the leading provider of surface preparation and finishing tools in the USA.

For more information on these tools, call 800-USA-Hyde.
