HYDE® MUDGUN™
For a better finish and much less mess
when taping and finishing drywall

SOUTHBRIDGE, MA – This professional drywall finishing system from Hyde Tools helps both pros and inexperienced users tape drywall faster with much less mess using an engineered applicator that holds and dispenses the right amount of compound for each step of the job.

In addition to the applicator, The HYDE® MudGun™ contains 2 specialized nozzles and an adjustable finishing head that facilitate the process of embedding tape and preparing the drywall surface for sanding and painting. The MudGun™ is available in two models, depending on the nature of the jobs to be accomplished (and therefore the amount of "mud" required to complete the job):

MudGun™ Small Repairs Kit (model #09600). For painters, plumbers, remodelers, do-it-yourselfers and others who primarily make small repairs, this kit uses convenient MudPaks™ (premixed drywall compound tubes) that provide a simpler and neater alternative to manually digging and applying compound out of a bucket. In addition to the applicator, nozzles and finishing head, the MudGun™ Small Repairs contains an inside corner smoothing tool and 6-inch taping knife, creating a complete kit for fast on-site repairs. Full instruction manual included.

MudGun™ Pro (model #09610). For those tackling larger drywall projects, the MudGun™ Pro includes a loading ring that allows you to fill the applicator directly from a 5-gallon bucket. The efficiency of the MudGun™ loading and delivery system saves pros time and therefore money on every job. For less-experienced users, its specialized nozzles and adjustable finishing head assure a consistently better finish. Detailed instruction manual and full-room finishing guide are included.

For more information on the HYDE® MudGun™, visit hydetools.com or contact Hyde Tools customer relations at 1-800-872-4933.
