FOR IMMEDIATE RELEASE

May 20, 2010

The following products were selected by retailers at the National Hardware Show for Retailers' Choice Awards from the National Retail Hardware Association.

HYDE® Pivot Nozzle Wands for Pressure Washers

The new HYDE® Pivot Nozzle Wand for Pressure Washers uses a technology specifically designed to save time and effort and offer what no other wand has—a *pivoting nozzle*.

Just twist the grip, and the patented nozzle pivots up to 90 degrees to help you keep the optimal 90-degree angle to the surface you're cleaning without the strain of stooping,

bending, kneeling or awkward reaching. It has a robust design and has been field and lab tested to ensure the rugged durability necessary for tough professional jobs.

The Pivot Nozzle gives you more control, and allows you to step back out of the path of falling water. It also helps users avoid common stress injuries, fatigue and accidents resulting from the use of high pressure while on a ladder. In lieu of climbing, you can reach high surfaces from the ground, pivoting the nozzle to achieve a correct angle and activating the pressure washer using the remote trigger.

In addition to a Retailers' Choice Award, the Pivot Nozzle Wand won two gold awards for packaging from the NRHA at the National Hardware Show, in the hand tools and lawn and garden categories.

Richard Paint Can Clip

Where has this simple solution been hiding?

From Hyde Group company A. Richard comes this sturdy plastic Paint Can Clip that solves an age-old problem in painting with a brush. Simply attach the clip to the handle of any quart or gallon-size paint can, and you can safely and easily carry the can with you while completing touch-ups or painting edges with a brush.

With your thumb through the loop and your fingers resting on the bottom of the can, you'll never lose your grip or get finger fatigue from the weight of the can. It's designed to rest against the side of the can for leverage. In addition, the clip features a metal tip for opening paint cans.
