HYDE® QUICKLY CLEAN™ GLOVE TRANSCENDS THE PAINT BAY

SOUTHBRIDGE, MA – No, it’s not magic. It’s a patented weave that creates a useful little “hook” at the end of each fiber. *That’s* what makes the Quickly Clean™ Glove do what it does best. Which is, of course, clean quickly!

Hyde introduced the Quickly Clean™ Glove two years ago at the National Hardware Show as a great solution for cleaning paint, drywall compound and caulk off tools and hands. At a price point under \$5.00, the glove has sold well and been touted by the likes of bobvila.com, Handy magazine and many other media outlets.

But it only took a little home testing by the folks at Hyde Tools to realize they were underselling the potential of this patented product.

“Turns out the president of the company washes his boat with this thing,” said Corey Talbot, Hyde’s head of marketing and product development. “I wash my hot tub, refrigerator, shower and dogs. It takes grease off your stove, oil off you car engine, algae off the lawn furniture and dirt off your golf clubs. With nothing but water and — at most — a mild soap. It’s awesome.”

That’s not to say the Quickly Clean Glove isn’t still the perfect painter’s cleanup companion. But the interest of others has prompted Hyde to package a second version that’s targeted to other areas of the store. Retailers interested should contact their Hyde Tools sales representative, email custrelations@hydertools.com or call (800) 872-4933. -end-
