Hyde Tools Introduces New Contour Scraper with Quick-Change Blade

The new Contour Scraper from Hyde Tools comes with *six stainless steel blades* that offer a different scraper profile on each end of the blade, for a total of 12 shapes and sizes that can be matched to any job, whether at home or at a worksite. A new *quick-release lever* makes changing blades fast and easy.

Whether flat, concave, convex or fluted, most surfaces can be matched to one of the blade shapes for smooth, easy scraping. Varying blade sizes and profiles allow you to reach into tight corners, scrape curves or small channels and more. Applications include:

- Wood moldings
- Chair rails
- Door and window casings
- Picture frames
- Balusters
- Stair rails or treads
- Wainscoting
- Dentil molding
- Mantels
- Pilasters

The ergonomic handle is comfortable for extended use. The sharp, durable blades can be re-sharpened as needed and come with a reusable blade storage container. Blade use suggestions are included in the package. The tool is also easy to clean and easy to display at retail.

Hyde Tools offers a range of tools used in surface prep and finishing, including putty knives, scrapers, wire brushes, drywall tools and a growing line of airless spray tools for painting and pressure washing. HYDE® brand tools are well known with pros and serious do-it-yourself users for being high-quality and durable. For more information, visit www.hydetools.com or call 800-USA-HYDE. Reference tool #10450.
