New From HYDE® Tools – Painter's Pyramid® No Waiting to Finish Painting!

The new Painter's Pyramid® from HYDE® Tools is an innovative solution to a long-felt problem – waiting for paint to dry before completing a job. Painter's Pyramid saves you time and effort by painting an entire object (top, bottom, and sides) without waiting for the paint to dry or sacrificing quality. Durable non-stick points have minimal contact, so you can paint one side, then immediately flip the work piece over and complete the job without drying time. The small plastic pyramids supports up to 200 pounds, is chemically resistant and holds your item above the work surface for less mess and easier clean-up. Use Painter's Pyramid for doors, shutters, cabinets, shelves, furniture, moldings and much more. Reuse multiple times after clean-up and stack for easy storage.

The Painter's Pyramid received the coveted Handyman Club of America Member Tested and Recommended and Contractors Tested and Recommended seals of approval with a **97% recommendation rating**. And, it was voted Retailers' Choice Award Product of the Year for the National Hardware Show.
