**HYDE TOOLS INTRODUCES THE NEW  
QUICKLY CLEAN™ GLOVE**

**SOUTHBRIDGE, MA** – Got a jobsite mess? Stubborn stains on your car? Oil paint on your hands and tools? Clean anything fast with the new, eco-friendly HYDE® Quickly Clean™ Glove.

Developed by a house painter, the HYDE® Quickly Clean™ Glove has a patented weave that turns it into a “miracle glove” for cleaning almost anything without harsh chemicals. It removes oil-based and latex paint, caulk, adhesive, grease, dirt and grime and more, using nothing harsher than plain water or mild hand soap. First intended for worksite cleanup, the Quickly Clean™ Glove is also perfect for household chores like cleaning the oven, refrigerator or shower.

Many products currently in use are chemical-based and labeled “avoid contact with your skin.” By contrast, the HYDE® Quickly Clean™ Glove actually buffs and rejuvenates skin. It is a healthful alternative to chemicals that are absorbed and dry the skin, and to Volatile Organic Compound (VOC) products that are being removed from the market.

From paintbrushes and trays to caulk guns and caked trowels, the Quickly Clean™ Glove is the ideal cleaning aid. The special materials and unique patented weave of this glove also makes it effective at removing spilled paint and stain from floorboards, tools and hardware, and algae, dirt and grime from outdoor lawn furniture, boats, grills and many other surfaces. The glove is reusable, machine washable and dryer safe.

One size fits most, allowing the Quickly Clean™ Glove to be used by both men and women. Perfect for painters, mechanics and hobbyists alike.

**The Quickly Clean™ Glove is now available at Ace, True Value and Do-It-Best locations, and is available online** through a variety of retail outlets. For more information and a video, go to [hydertools.com](http://hydertools.com) and search item [#44250](#).
