**The HYDE® StirWhip™:  
An all-purpose mixer that won't stress your drill**

SOUTHBRIDGE, MA – The HYDE® StirWhip™ is a versatile mixer with a unique design that's effective for mixing even heavy materials without overworking your drill.

Designed with a 3/8" steel hex shank and a nylon mixing head, the StirWhip™ features flexible "fingers" that reach into the corners of containers for more complete mixing. This unique mixing head offers any number of benefits, providing:

- Maximum lift from the bottom of containers
- Low drag for mixing thick materials with less power (so it won't kill your battery!)
- Flexes to fit through 5-gallon pour spout for use without opening the bucket
- Cleans up in seconds

This mixer is versatile, durable, easy to clean, and easy on the drill. Whether for worksites or for home use, it's the perfect all-purpose mixer, and its light torque requirements may substantially prolong the life of your drill. Designed for use with 1 to 5-gallon containers and a 500-1500 rpm variable speed drill. Excellent for mixing paint, joint compound, concrete, grout, thinset, epoxies, lacquers, adhesives and sealants.

For more information about the HYDE® StirWhip™ (item #43440), visit [hydetools.com](http://hydetools.com) or contact Hyde Tools customer relations at 1-800-872-4933.
